

Advanced Fine Art Mastery Program

Rs. 45000/-
Duration: 96 Hours
4 Months

The Advanced Fine Art Mastery Program is designed for students who want to further develop their artistic skills and explore art at a deeper level. This course helps learners refine their techniques, experiment with a wide range of mediums, and gradually develop their own unique artistic style.

The program focuses on realistic drawing, expressive artworks, detailed portraiture, landscape painting, and professional portfolio development. Students will also gain hands-on experience with oil painting and advanced painting techniques, preparing them for professional art opportunities.

MEDIUMS COVERED

Students will work with a wide variety of professional art mediums, including:

Advanced Graphite & Charcoal | Color Pencils (Realistic rendering and fine detailing)

Soft Pastels | Watercolors (Professional techniques) | Acrylic Paints | Oil Paints | Mixed Media Techniques

Advanced Drawing & Composition

This section focuses on strengthening drawing skills and creating more complex compositions.

- > Advanced shading techniques and creating depth
- > Complex still life compositions
- > Understanding visual balance, contrast and composition in artwork

Portrait Drawing

Students learn the techniques required to create detailed and realistic portraits.

- > Detailed study of facial anatomy
- > Accurate facial proportions
- > Skin texture and realistic hair rendering
- > Understanding light direction and shadow effects on the face
- > Creating realistic portraits using pencil or charcoal

Color Portrait Techniques

This module focuses on adding realism and expression to portraits using color.

- > Advanced color theory for realistic skin tones
- > Color pencil realism techniques
- > Capturing expressions and emotions in portraits

Landscape & Nature Painting

Students explore the beauty of nature through painting and develop skills to create atmospheric landscapes.

- > Study of natural elements such as trees, skies, clouds, water, and rocks
- > Understanding atmospheric perspective
- > Creating mood and depth through color harmony
- > Landscape painting using watercolors and acrylics

Acrylic & Still Life Painting

This section focuses on realistic still life painting using acrylics.

- > Complex still life arrangements
- > Painting reflective and transparent surfaces
- > Brush techniques and layering methods
- > Realistic acrylic painting approaches

Oil Painting Techniques

Students are introduced to the fundamentals and professional practices of oil painting.

- > Introduction to oil painting materials and safety practices
- > Understanding oil mediums and drying times
- > Underpainting and layering techniques
- > Color blending and creating smooth transitions
- > Creating still life or portrait paintings using oils

Figure Drawing & Creative Exploration

This module encourages creative growth and a deeper understanding of the human form.

- > Human body proportions and anatomy
- > Gesture drawing and capturing movement
- > Drawing fabric folds and dynamic poses
- > Mixed media experimentation
- > Developing a personal artistic style

Portfolio Development & Final Projects

Towards the end of the program, students focus on building a professional art portfolio.

- > Concept planning and artwork selection
- > Creation of 2–3 finished artworks in different mediums
- > Individual feedback and improvement guidance
- > Portfolio presentation and preparation tips
